## COVER LETTER

I'm writing to apply for the Game Developer position, as advertised on your website careers page.

I have 1 year of experience in game development with Unity. I published 3 games on Google Play Store for now and I want to get more game development skills and experiences.

I've included my resume so you can learn more about me and my works.

Thank you for your time and consideration.

Please feel free to email me or call me on my mobile phone.

I hope to hear from you soon.

Sincerely,

Deniz Sarıbayır
