- Turkish (Native)
- English (B2-C1)

PROJECTS

SPACESHIP STARCRAFT

It is a space-themed 2D mobile (Android) game project. In addition to the story mode, it includes another game modes, market system and achievements. Apart from the coding of the game, the drawings are also mine. It was developed with Unity and drawn with Aseprite.

RANDOM TOOLS

It is an Android application that I developed with what I learned in my internship. It is a multi-purpose program that enables the use of various basic functions from a single application. Developed with Kotlin.
