ABOUT

I started my software development journey by bringing my own project ideas to life with Windows Forms, Unity and ASP.NET technologies. With a strong passion for both game development and web programming, I aspire to build a career in these fields. My hands-on experience and enthusiasm for creating software solutions drive me to continually learn and adapt in the ever-evolving world of technology.

SKILLS

- Game development with Unity
- Microsoft ASP.NET MVC
- C++ ve C# desktop and console applications
- Android application development with Java & Kotlin
- Web design using ready-made themes with HTML, CSS, Javascript
- Microsoft Office Programs (Word, Excel, PowerPoint)

WORK EXPERIENCES

SOFTWARE DEVELOPMENT ASSISTANT SPECIALIST | INDEX GROUP
10.10.2022 – PRESENT

- https://www.indexgruppazar.com/ B2B site project management, development tests, analysis and documentation studies
- https://garanti.indexgrup.com/ digital warranty certificate and user manual project backend developments (.Net and Javascript) and tests
- https://www.indexgruppazar.com/ site Front-end and back-end developments with React.JS, .NET

INTERN | HEPSIBURADA
01.08.2022 – 26.08.2022

- Helpdesk employee
- Windows and Mac computer setups
- RAM and SSD health check
- Computer part replacements

INTERN | HEPSIJET
06.06.2022 – 01.07.2022

- Android application development with Java & Kotlin

HOBBIES

- Chess
- Video games
- Cosplay
- Swimming
- Cycling

LANGUAGES

- Turkish (Native)
- English (B2)

EDUCATION

SAKARYA UNIVERSITY
2018 – 2022
COMPUTER ENGINEERING – 2.93

ATAKOY CUMHURIYET HIGH SCHOOL
2014 – 2018

PROJECTS

GARANTI-INDEX

It is a project in which I carried out the backend development (.Net & JavaScript) and testing process on transferring the warranty certificate and user manuals to the digital environment. I used IP control for some pages, logged in with sessions, and wrote different authorization services for various functions on the site.

https://garanti.indexgrup.com

INDEXGRUPPAZAR

I joined the project www.indexgruppazar.com at a later stage, contributing by testing the developments made in previous phases and reporting the results. Over time, I became a part of the project's management team and successfully completed all testing processes, while also creating documentation. After the project went live, I actively took on the development of the frontend using React and the backend using .Net. During this process, I made significant improvements to enhance the user experience and functionality of the project.

SPACESHIP STARCRAFT

It is a space-themed 2D mobile (Android) game project. In addition to the story mode, it includes another game modes, market system and achievements. Apart from the coding of the game, the drawings are also mine.It was developed with Unity and drawn with Aseprite.

RANDOM TOOLS
It is an Android application that I developed with what I learned in my internship. It is a multi-purpose program that enables the use of various basic functions from a single application. Developed with Kotlin.
