BEGINNING OF THE HEROISM
It is my final project where I undertake the coding and stage design. It is a platform type 2D mobile (Android) game developed with Unity.

https://play.google.com/store/apps/details?id=com.DOM.BeginningofTheHeroism

ROAD TO HEROISM
It is my design project where I undertake the coding and stage design. It is a platform type 2D mobile (Android) game developed with Unity.

https://play.google.com/store/apps/details?id=com.DOM.RoadToHeroism

EXTRAORDINARY
This project is a TV series, movie and anime review site. After logging in, users can review and comment on any product attached to the site. It was developed using .NET.

https://github.com/chareless/FilmSitesi

RANDOM TOOLS
It is an Android application that I developed with what I learned in my internship. It is a multi-purpose program that enables the use of various basic functions from a single application. Developed with Kotlin.
